<b>Preface</b>	<b>xiii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Earthworm segments, skewness and kurtosis	2
1.2 Empirical likelihood, parametric likelihood, and the bootstrap	4
1.3 Bibliographic notes	6
<b>2 Empirical likelihood</b>	<b>7</b>
2.1 Nonparametric maximum likelihood	7
2.2 Nonparametric likelihood ratios	10
2.3 Ties in the data	11
2.4 Multinomial on the sample	12
2.5 EL for a univariate mean	16
2.6 Coverage accuracy	17
2.7 One-sided coverage levels	19
2.8 Power and efficiency	20
2.9 Computing EL for a univariate mean	21
2.10 Empirical discovery of parametric families	24
2.11 Bibliographic notes	25
2.12 Exercises	27
<b>3 EL for random vectors</b>	<b>29</b>
3.1 NPMLE for IID vectors	29
3.2 EL for a multivariate mean	30
3.3 Fisher, Bartlett, and bootstrap calibration	31
3.4 Smooth functions of means	35
3.5 Estimating equations	39
3.6 EL for quantiles	43
3.7 Ties and quantiles	45
3.8 Likelihood-based estimating equations	48
3.9 Transformation invariance of EL	50
3.10 Side information	51
3.11 Sandwich estimator	55
3.12 Robust estimators	56

3.13	Robust likelihood	59
3.14	Computation and convex duality	60
3.15	Euclidean likelihood	63
3.16	Other nonparametric likelihoods	66
3.17	Bibliographic notes	70
3.18	Exercises	74
<b>4</b>	<b>Regression and modeling</b>	<b>79</b>
4.1	Random predictors	79
4.2	Nonrandom predictors	83
4.3	Triangular array ELT	85
4.4	Analysis of variance	87
4.5	Variance modeling	90
4.6	Nonlinear least squares	91
4.7	Generalized linear models	95
4.8	Poisson regression	101
4.9	Calibration, prediction, and tolerance regions	104
4.10	Euclidean likelihood for regression and ANOVA	106
4.11	Bibliographic notes	107
4.12	Exercises	108
<b>5</b>	<b>Empirical likelihood and smoothing</b>	<b>111</b>
5.1	Kernel estimates	111
5.2	Bias and variance	113
5.3	EL for kernel smooths	114
5.4	Blood pressure trajectories	116
5.5	Conditional quantiles	117
5.6	Simultaneous inference	118
5.7	An additive model	121
5.8	Bibliographic notes	124
5.9	Exercises	125
<b>6</b>	<b>Biased and incomplete samples</b>	<b>127</b>
6.1	Biased sampling	127
6.2	Multiple biased samples	130
6.3	Truncation and censoring	135
6.4	NPMLE's for censored and truncated data	139
6.5	Product-limit estimators	141
6.6	EL for right censoring	143
6.7	Proportional hazards	147
6.8	Further empirical likelihood ratio results	147
6.9	Bibliographic notes	149
6.10	Exercises	153

<b>7 Bands for distributions</b>	<b>155</b>
7.1 The ECDF	156
7.2 Exact calibration of ECDF bands	157
7.3 Asymptotics of bands	158
7.4 Bibliographic notes	160
<b>8 Dependent data</b>	<b>163</b>
8.1 Time series	163
8.2 Reducing to independence	165
8.3 Blockwise empirical likelihood	168
8.4 Spectral method	173
8.5 Finite populations	174
8.6 MELE's using side information	176
8.7 Sampling designs	177
8.8 Empirical likelihood ratios for finite populations	179
8.9 Other dependent data	180
8.10 Bibliographic notes	180
8.11 Exercises	183
<b>9 Hybrids and connections</b>	<b>185</b>
9.1 Product of parametric and empirical likelihoods	185
9.2 Parametric conditional likelihood	186
9.3 Parametric models for data ranges	187
9.4 Empirical likelihood and Bayes	188
9.5 Bayesian bootstrap	188
9.6 Least favorable families and nonparametric tilting	189
9.7 Bootstrap likelihood	191
9.8 Bootstrapping from an NPMLE	191
9.9 Jackknives	192
9.10 Sieves	194
9.11 Bibliographic notes	196
9.12 Exercises	199
<b>10 Challenges for EL</b>	<b>201</b>
10.1 Symmetry	201
10.2 Independence	207
10.3 Comparison to permutation tests	208
10.4 Convex hull condition	209
10.5 Inequality and qualitative constraints	210
10.6 Nonsmooth estimating equations	211
10.7 Adverse estimating equations and black boxes	213
10.8 Bibliographic notes	213
10.9 Exercises	215

<b>11 Some proofs</b>	<b>217</b>
11.1 Lemmas	217
11.2 Univariate and Vector ELT	219
11.3 Triangular array ELT	222
11.4 Multi-sample ELT	223
11.5 Bibliographic notes	226
<b>12 Algorithms</b>	<b>229</b>
12.1 Statistical tasks	230
12.2 Smooth optimization	232
12.3 Estimating equation methods	234
12.4 Partial derivatives	238
12.5 Primal problem	241
12.6 Sequential linearization	244
12.7 Bibliographic notes	247
<b>13 Higher order asymptotics</b>	<b>249</b>
13.1 Bartlett correction	249
13.2 Bartlett correction and smooth functions of means	250
13.3 Pseudo-likelihood theory	251
13.4 Signed root corrections	253
13.5 Large deviations	255
13.6 Bibliographic notes	257
13.7 Exercises	258
<b>Appendix</b>	<b>261</b>
A.1 Order and stochastic order notation	261
A.2 Parametric models	262
A.3 Likelihood	264
A.4 The bootstrap idea	266
A.5 Bootstrap confidence intervals	267
A.6 Better bootstrap confidence intervals	269
A.7 Bibliographic notes	271
